SAINT-GOBAIN GLASS LAUNCHES CALUMEN® SUITE

Saint-Gobain Glass announces the creation of **Calumen® Suite**, its **new suite of digital services**, and launches the first online tool in this suite, new **Calumen®**.

Calumen®

New **Calumen®**, replacing the current CalumenLive service, is a brand-new **glazing configurator** designed for all building professionals, **whatever their level of expertise in glass products**: architects, designers, engineering offices, consultants, façade makers, window manufacturers, glass processors and general contractors.

Through a **user-friendly interface**, this innovative version of **Calumen®** is offering key functionalities for users:

- ✓ Project mode
- ✓ Multiple glazing comparison mode
- ✓ Reverse mode
- ✓ Backup
- ✓ Duplication
- ✓ Enriched acoustic database
- ✓ Rendering illustrations
- ✓ Official certificates

With its **all-in-one design** and ease-of-use features, new **Calumen®** is the perfect tool for **finding the right glass for architectural projects** of any size, for **residential windows** and all other applications of glass in buildings.

Available for worldwide users in 13 languages, new **Calumen®** is accessible at www.calumen.com

What's in a name?

The name Calumen® is a shortcut of “calculation” and “lumen”. The lumen is the international unit for the luminous flux.

Beyond this initial launch, Saint-Gobain Glass will gradually add new services and functionalities to **Calumen® Suite** to provide ever more effective support to the various stakeholders in all its building markets.
