

MASTERFLEX®

Description

ENJOY GEOMETRIC INFLECTION !

This arrangement generates an alternated bright starry depression. The surface obtained is a square pavement with soft privacy punctuated by a bright star-shaped mesh.

THE MINIMALISM OF THE STRUCTURE

Design research focused on the minimalism of the structure and a rigorous geometry led the designer Paul ARED, to a bold proposal, simply maximizing the refraction of light in the mass of the glass.

RANGE

MASTERFLEX is the latest pattern of the MASTERGLASS range.
MASTERGLASS® : 7 unique patterns

PROCESSING

Depending on the patterns, MASTERFLEX® can be:
