

CALUMENLIVE

CALUMENLIVE

The engine for every technical detail of your glazing

THE ONLINE GLAZING CONFIGURATION TOOL

CalumenLive is a **free** calculator which has been designed as a straightforward way to obtain technical configurations for glazing. It helps you to weigh up the best glazing for your project.

If you are an architect, engineer, window manufacturer or head of a design team, you want to ensure you are meeting your customers' requirements. You can use **CalumenLive** to add value to your projects by selecting the most suitable glazing for the level of quality and comfort required.

CalumenLive includes innovative features that focus on technical specifications to ensure your project benefits from the range of comfort features available with **Saint-Gobain glazing**.

CalumenLive can be used in two ways:

- If you've already purchased your glazing and are looking to upgrade it, CalumenLive will generate mounting performance measurements in line with current regulations.
- If you know what specifications you need, Calumenlive will identify the most suitable glazing in the Saint-Gobain range.

By using the different filters you can select your performance requirements (thermal insulation, acoustic comfort, solar control, security, etc) then find glazing that meets your specifications.

The **CalumenLive** calculator is TUV certified and available online on smartphone, tablet or PC.

CalumenLive, a free, easy to use, certified tool which will improve your sales.
