

# EASYPRO®

## Description

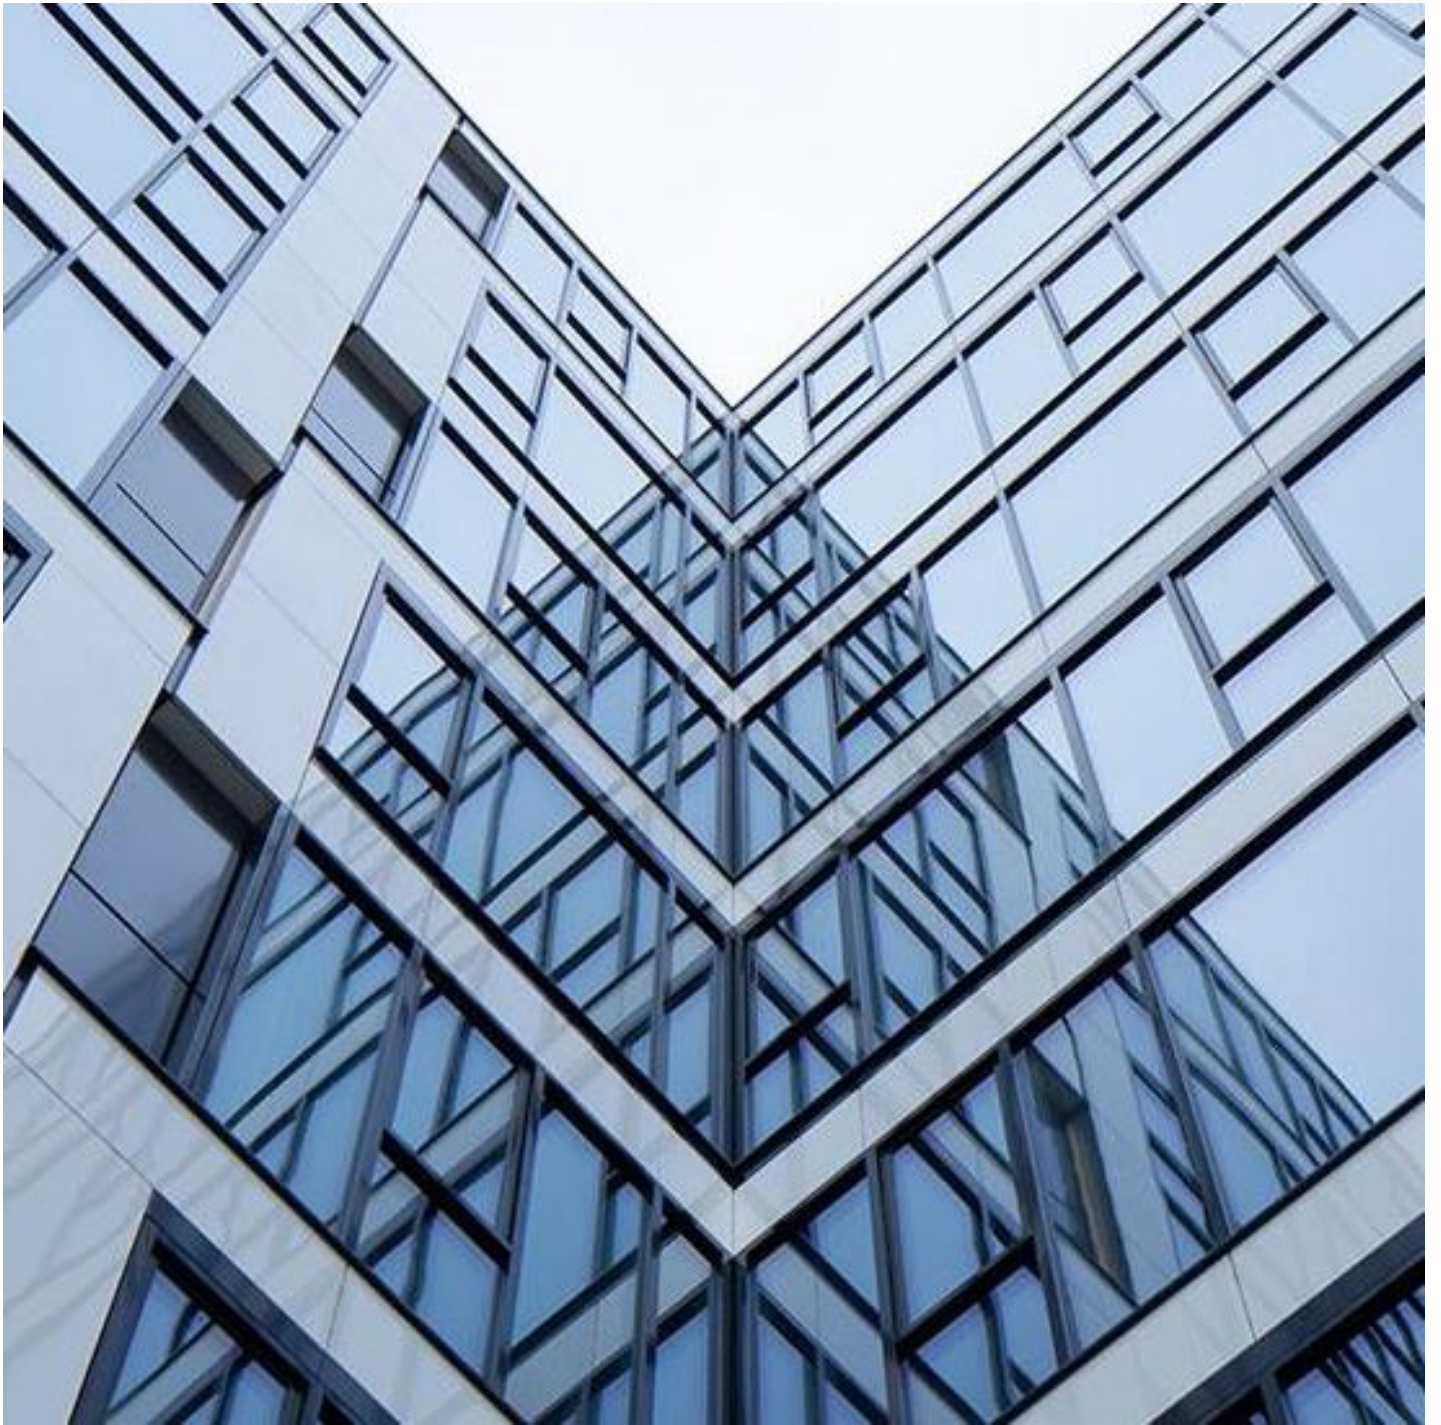

EASYPRO is featured on our COOL-LITE SKN II product range as standard. There is no specific product uses as this is a sacrificial coating that burns off during the tempering process.

## ADVANTAGES

EASYPRO gives glass processors significant amount of benefits, including:

- Shorter tempering cycle times
- Extensive storage period
- No cover/backing sheets necessary
- Unsealed packs therefore save time and are secure
- Extended shelf life of rest plates
- Improved shelf life after edge working
- Easier transporting of glass with decreased scratching
- Reduction of waste & quality issues
- No traditional film applications need to be removed
- Subsequently no waste production and disposal

*For the full list of benefits and further detail please see the EASYPRO brochure or contact the local Technical Support Manager.*
