

MIRALITE NATURA

Peach Tone Mirror

REFLECTS WHO
YOU REALLY ARE

BUILDING GLASS EUROPE

SAINT-GOBAIN

TURN HARSH ARTIFICIAL LIGHT INTO SOMETHING MORE BEAUTIFUL

In dressing rooms and bathrooms, artificial lighting is not always a person's best friend. Many lighting sources, especially LED and halogen, create a cold atmosphere. The reflection doesn't feel right, and can even be unflattering. MIRALITE NATURA is here to change all that. With its specially developed filter, harsh cold light is balanced and corrected. For a more natural reflection.

MIRALITE NATURA

ENHANCED BEAUTY IS STARING YOU IN THE FACE

MIRALITE NATURA is a mirror with a peach tone which counterbalances the greenish aspect of the glass. So MIRALITE NATURA produces a more faithful reflection of reality than a traditional mirror, a reflection that looks very natural.

Advantages people will love

AESTHETICS

The peach colour of MIRALITE NATURA gives a softer, more authentic reflection. The subtle colouring of the glass brightens the mood, making it more pleasant.

COMFORT

MIRALITE NATURA helps create a bright, welcoming sensation to warm any space and add to a feeling of well-being.

PERFORMANCE

As with all Saint-Gobain mirrors, quality and durability of MIRALITE NATURA are optimal to allow it to be used in any interior situation, including damp rooms (bathrooms).

Reflection with standard mirror

Reflection with Miralite Natura

MIRALITE NATURA

SO MANY PLACES TO REFLECT A BETTER IMAGE

Homes and dwellings

The aesthetic advantages of MIRALITE NATURA allow the creation of welcoming living spaces (entrance hall, living room, bathroom, corridor, kitchen, etc). MIRALITE NATURA can be fixed as wall coverage or for any kind of furniture (cupboard, doors, sliding doors, bathroom cabinet, etc)

Retail shops, restaurants, hotels, well-being centres, and gyms

MIRALITE NATURA helps create a warm and relaxing atmosphere in shops and retail. Improved customer experience will naturally lead to increased turnover.

MIRALITE NATURA boosts your business!

In Paris, a leading fashion boutique put MIRALITE NATURA to the test*. To prove the effect of MIRALITE NATURA on clients' behaviour, some fitting rooms were equipped with new MIRALITE NATURA mirrors, while some others were left unchanged. When asked, 14% more clients perceived the space as luminous, 7% more felt the MIRALITE NATURA fitting rooms had a "pleasant atmosphere" and 7% more felt the mood was "soft and warm". Number of buyers went up **6%**, conversion from trying clothes to buying increased **7%**, and **store turnover lifted 6%**.

*Test on a sample of more than 600 people.

THE RESULTS WERE IMPRESSIVE WITH A MEASURABLE IMPACT ON HOW SPACE QUALITY WAS PERCEIVED.

"For my customers, MIRALITE NATURA plays a subtle but valuable role in giving them a quality experience."

John, shop owner

"Together with wood, MIRALITE NATURA is a key element in designing welcoming, comfortable spaces. I've used it in retail stores, hair salons and hotels."

Peter, interior designer

"Installing MIRALITE NATURA is as simple and quick as fitting any standard mirror, but with MIRALITE NATURA my work is more valuable to my clients."

Mark, glass installer

MIRALITE NATURA

The product range

MIRALITE NATURA is produced using an innovative and patented technology

To compare with the composition of MIRALITE REVOLUTION

PROCESSING

As with a standard mirror, MIRALITE NATURA can be processed and shaped at will:

- It can be cut into any geometric or non-geometric shapes and can be drilled, edgeworked (bevel, chamfer, etc),
- It can be customised with a logo or screen-printed design, sandblasted or engraved design on the face opposite the coating. Sand blasting or engraving on the coating face requires a preliminary test.

INSTALLATION

1. Fixing with glues

Approved glues
